

Care and Maintenance

Contents:

Introduction

Care for your umbrella

Conclusion

1. Introduction

Radiant Plant Shade products are crafted from power coated quality steel wire to resist environmental damage. In addition to quality components proper care and storage will enhance their lifespan and will keep them looking new.

2. Caring for your umbrella

When your umbrella gets dusty or dirty consider;

- Using a firm brush to clean the frame or fabric components
- Using a damp cloth to remove dirt from the frame and clean spots on the canopy using a mild soap and water. For a more thorough wash use a light load, cold water, mild detergent and sun dry.
- If the canopy is deteriorated it may have to be replaced - contact Radiant Plant Shade

Proper storage adds year to the life of your umbrella

- Clean and dry your umbrella frame and canopy
- Close the umbrella
- Consider a moisture-reducing agent
- Place in the delivery bag and delivery box for storage.
- Proper storage reduces mildew and rust

3. Conclusion

Regular maintenance will extend the life of your umbrella. These guidelines help keep your umbrella vibrant and functional. Enjoy the longevity and beauty of your Radiant Plant Shade plant umbrella.
